Professional Summary

Aspiring Front-End Developer with solid skills in HTML, CSS, JavaScript, React, Next.js, and Tailwind CSS, eager to launch a career in web development.
Completed a professional Front-End Development course at Academy SoftClub (2025), gaining hands-on experience by building an Instagram clone, developing the Fastcart online store, and working on a personal project.
Passionate about creating clean, responsive, and user-friendly interfaces that enhance the overall user experience.

Skills

JavaScript, React, Next.js, RTK, Zustand, Jotai, MobX, Git, HTML, CSS, Tailwind CSS, Material-UI, Chakra UI, GitHub, JWT, Backend Integration, TypeScript, SASS, C++, SCSS, REST API

Education

School

- Secondary School №22 (2013 - 2016)
- Secondary School №88 (2017 - 2024)

Univercity

- Technology University of Tajikistan (2024)
- Faculty - Programming Engeneer

Frontend Course

- Softclub Academy (05.12.2024 - 05.08. 2025)

Projects

Fast-Cart

- **GitHub** | **Demo** - an online store built with React, Zustand for state management, and Material UI for the interface design. Utilized Axios for API requests, React Router for navigation, Sonner for notifications, Swiper for interactive sliders, and Tailwind CSS for styling. Implemented responsive design for smooth mobile experience and user authentication with JWT decoding. Developed core features like product listing, filtering, and shopping cart to ensure a seamless and user-friendly shopping journey.

- **GitHub** | **Demo**- an admin dashboard developed using React, Zustand for state management, and Material UI for the interface design. Implemented features such as product, category, and order management to ensure efficient and user-friendly store administration.

Clone-Instagram

- GitHub | Demo - a social media web application built with Next.js, Tailwind CSS, and Material UI for a modern and responsive design. Used Axios for API requests, React Router for navigation, JWT decoding for user authentication, and i18next for multi-language support. Collaborated in a team to develop core features such as user profiles, posts, likes, and comments, ensuring a smooth and engaging user experience.

RentArena

- GitHub | Demo - an MVP version of a multi-language sports field booking platform built with Next.js and TypeScript. Used Zustand for state management, Material UI and Tailwind CSS for UI design, and Swiper for interactive sliders. Included responsive layout, dynamic routing, and language switching to ensure accessibility across devices and audiences. This is the first functional version, with plans to launch a more advanced V2 featuring expanded features and improved UX.

Villa Fenix Exhibition Website

- Demo-a production-ready multilingual exhibition platform for Villa Fenix, aimed at onboarding and engaging business participants from multiple countries. Developed using React (Vite), with Zustand for state management, Ant Design and Tailwind CSS for scalable UI, and Leaflet for map-based interaction. Implemented internationalization, responsive design, and structured user flows including registration and application submission. Integrated utilities such as libphonenumber-js and react-flagkit to enhance global usability and user experience.

Languages

Tajik (Native), Russian (Basic), English (Pre-Intermediate)
